Cycling

The quickest way to travel short distances in towns is by bike. A maintained bike is ready when you are, with very little that can go wrong. A bike can nearly always be parked outside your destination. It's cheap and reliable plus you feel better by being a little active. And above all, it's fun!

Walking

Walking offers most of us the chance to stay fit and healthy and get around over short distances. It is pollution free and a sociable activity, allowing plenty of opportunities to bump into neighbours or to meet up with friends. Walking is usually the fastest and most efficient way of getting around town for those living locally and avoids all the frustration and delay of taking the car.
